JEBRES FAMILIES PROFILE
Population = 6,491
Households (HH) = 32,283
Average HH size = 4.9

EDUCATION
Out of 5,295 children of school-going age, 290 are not in school. This is lower than the Kecamatan average of 6%. Even so, a higher proportion of children living near the railroad are not in school. These children may be leaving school to support family income.

WATER
Jebres has many large hills and families must dig deep wells to access groundwater. Residents in the west have clean, fresh water. However, PDAM in the north uses river water. This is a concern for residents, who prefer bottled water.

SANITATION
Jebres has many large hills and families must dig deep wells to access groundwater. Residents in the west have clean, fresh water. However, PDAM in the north uses river water. This is a concern for residents, who prefer bottled water.

Housing
Land tenure is slightly lower than the Kec. average of 80%. Tenure is above average in the older area of settlement west of Jalan Ir. Sumati. It is also above average in the area with many student boarding houses. Tenure is low near the railroad and the river.

Economy / Poverty
Jebres has the second lowest poverty level in the Kec. Vendors and other informal workers often create livelihoods around the public institutions.

Health
There are high quality public health facilities in Jebres. Since there are so many public health workers, the community is well informed about health issues.

What are Kelurahan assets?
- Economic activity of students and UNS
- Public health institutions
- Connections to city and region

What are potential issues?
- Inadequate infrastructure for large population in east Jebres
- Potential loss of public space
- Safety in student enclaves
