What's happening in Pajang?

Pajang is on the border of Sukoharjo and at the entrance of the city. There are many educational institutions and small-scale batik producers. North Pajang has much better services and access to the city than south Pajang.

This Mini Atlas collects information about Pajang so everyone can see and understand what is going on. Information about the condition of services can help people discuss what they want from the annual participatory budgeting process, the musrenbang. Our goal is to make citizens more informed about their communities.

What are Pajang's assets?

- Good transportation connections
- Institutional and commercial center
- Balanced workforce, batik factories, skilled batik workers

What are potential issues?

- High number of poor families compared to other Kelurahan
- Pollution and flooding along the river is bad for health
- Public water service is low

EDUCATION

Here can education opportunities be improved for Pajang's youth?

5% of children are out of school, a little above the Kecamatan average of 4%. Public schools are well distributed throughout Pajang.

OUT OF SCHOOL

5% of children
