**What’s happening in Pucang Sawit?**

Pucang Sawit is a gateway to the city. It is large and has new industrial development and educational centers. While there is low access to services, there is high employment and educational opportunities.

This Mini Atlas collects information about Pucang Sawit so everyone can see and understand what is going on. Information about the condition of services can help people discuss what they want from the annual participatory budgeting process, musrenbang. Our goal is to make citizens more informed about their communities.

**EDUCATION**

Out of 2,266 children only 48 are out of school. This is below the Kecamatan average of 6%. This is an asset for the community in the future. Absenteeism tends to be more common where there is more poverty and informal housing.

**WATER**

Access to PDAM is very low in Pucang Sawit. Well water may be polluted.

**SANITATION**

Access to private WC is below the Kecamatan average of 73%. Residents have said that public WC are not distributed well in the Kelurahan.

**Housing**

Land tenure is much lower than the Kec. average of 80%. Low land tenure may be attributed to informal housing near the river, cemeteries, and railroad, as well as student housing.

**Economy / Poverty**

Many employment opportunities exist in Pucang Sawit.

**Health**

Pucang Sawit faces many health-related issues including air and water pollution from factories and improper sanitation removal. The yearly flooding of the Bengawan also poses health risks.

**Assets**

Pucang Sawit has a high number of factories. It will be a challenge to keep these economic opportunities. It will also be difficult to maintain clean air and water.

**Public versus Private WC**

Public = 27%

Private = 58%

No Data = 15%
