What’s happening in Serengan?

Serengan is a residential neighborhood in the south of the Solo. Despite its small size, it is very dense. There are many home workshops that produce artisanal goods such as textiles.

This Mini Atlas collects information about Serengan so everyone can see and know what is going on. Information about the condition of services can help people discuss what they want from the annual participatory budgeting process, musrenbang. Our goal is to make citizens more informed about their communities.

What are Serengan’s assets?

Serengan has lower poverty and higher land tenure than many other Kelurahan. These are key assets that make Serengan stable. Support for entrepreneurs can create more jobs for residents.

What are potential issues?

Flooding near the river and overcrowding are key challenges for Serengan. Support for public health services would also help.

EDUCATION

4% of children are out of school. This absentee rate is the same as the Kecamatan average of 4%. However, children out of school typically live in low-income areas. This may limit their capacity to access employment in the future.

WATER

The condition of the Jenes River may be related to dengue and cikungunya.

SANITATION

Access to private sanitation is limited in the west area of Jl. Arjuno II. However, access to public wells here is also below the Kecamatan average of 24%.
